

- 1) **What is a Do-It-Yourself DNA test?**
A DIY DNA test is a comparison of DNA patterns to determine relationship between tested people and is self sampled.
- 2) **For what purposes can I use the test and its results?**
The test can be used to prove a relationship between maximum 3 persons. The results may only be used for personal knowledge.
- 3) **What is included in the DIY Kit?**
Instructions, sample information form, 3 buccal swab sample envelopes and pre-addressed envelop.
- 4) **Who can be tested?**
A maximum of three (3) persons can be tested with each DIY Kit.
- 5) **How is the buccal swab sample collected?**
The sample collection is very easy. Just follow the instructions supplied with the DIY Kit.
- 6) **Must all samples be collected at the same time?**
No this is not necessary as long as all samples are shipped at the same time.
- 7) **How to ship the sample collection kit?**
After samples have been collected you can either ship the sample by airmail (post office) or with the carrier of choice (FedEx, UPS, DHL etc.) at additional costs.
- 8) **How long does the actual testing take?**
Once the lab has received all the samples it takes approximately 2-3 weeks to complete the testing.
- 9) **How long will it take to get results?**
By e-mail the results will be available immediately after completing of the testing. By airmail this will take approximately 2 - 4 weeks after completing of the testing.
- 10) **Where and how are the test results send?**
Once the results are ready the lab can send the results either to the address (by post) or e-mail you specified on the sample information form.
- 11) **How much does the test cost?**
The charge for a DIY (maximum 3 persons) is NAf. 795,-. This price is excluding 5% O.B.
- 12) **Who can I contact for additional questions?**
You can always contact Curacao DNA Center by telephone 691-2006 or e-mail curacaodnacenter@live.com.
